

INDEX OF BIRD PHOTOS - NICK ATHANAS / ANTPITTA.COM

All photos are currently hosted on Flickr, and these links will take you to my Flickr site (<https://www.flickr.com/antpitta/>). I do not block downloads, so you can download anything by clicking the down arrow icon in the lower right part of the screen. Use the "find" function to quickly locate what you are looking for, or just scroll down if you prefer. CTRL-F is a shortcut for the find function on most English-language apps. The order of the list follows Clements/eBird, with yearly updates. The first column is the number of photos. The second column is a subjective quality rating for the photo (or the best photo if there are more than one), from A (best) to E (worst). These ratings often reflect my personal tastes, so you may not agree with all of them. I frequently reevaluate photos, and some of my earlier shots were rated too high - I am working on updating them. I am replacing older photos with higher resolution and non-watermarked versions. I have done most but not all of them. If there is any photo you would like in higher resolution, just let me know at nick_athanas@hotmail.com.

Note: I recommend shift-clicking these links to open them up into new browser tabs.

Totals: 6019 photos/3529 bird species. Recently added photos may not be in the index yet. Updated 28 December 2020.
